

HYDRA mate

HYDRAMATE STRING WOUND FILTER CARTRIDGE

DESIGNED FOR RELIABLE AND CONSISTENT FILTRATION
ACROSS A WIDE RANGE OF APPLICATIONS

Hydramate String Wound Filters Cartridges are designed for high-performance depth filtration in commercial industrial applications. The multi-layered winding structure enhances dirt-holding capacity and provides efficient particle removal across a wide range of filtration requirements.

Manufactured from high-quality polypropylene, offering durability and consistent filtration performance these cartridges are suitable for various operating conditions, including demanding process environments.

APPLICATIONS

- Food & Beverage Industry
- Drinking Water Systems
- RO Pre-treatment Systems
- Commercial and Residential Buildings

FEATURES

- Depth filtration structure for improved particle retention
- Easy installation and replacement, reducing maintenance time and costs
- Supports filtration ratings of 1-100 micron (Nominal)
- Durable construction with high pressure resistance
- Long service life with high dirt-holding capacity
- Big Blue option available for high flow applications

SPECIFICATIONS

- Filter Media: Polypropylene
- Core: Polypropylene
- Maximum Differential Pressure: 100 psi
- Maximum Temperature: 80°C

ORDERING INFORMATION

EXAMPLE: P5-10P

PRODUCT	MATERIAL	MICRON RATING	LENGTH	CORE	DIAMETER(INCH)
