

HYDRA mate

HYDRAMATE CARBON BLOCK FILTER CARTRIDGE

Effectively reduces chlorine and odor to improve overall water quality

Hydramate Carbon Block Filter Cartridges are designed to deliver reliable water filtration performance for commercial and industrial applications. Using high-quality activated carbon with a high surface area, they effectively reduce chlorine, odor, color, and organic contaminants in water.

The uniform carbon structure ensures a consistent flow rate and good dirt-holding capacity, helping to extend service life and reduce maintenance costs. Available in both standard and Big Blue sizes, they are suitable for applications requiring higher flow rates.

APPLICATIONS

- Food & Beverage Industry
- Drinking Water Systems
- RO Pre-treatment Systems
- Commercial and Residential Buildings

FEATURES

- High chlorine reduction for improved taste and odor
- Premium activated carbon with high adsorption capacity
- High dirt holding capacity for extended service life
- Consistent flow rate and stable performance
- Durable construction for long-term use
- Compatible with standard and Big Blue housings

SPECIFICATIONS

- Filter Media: Activated Carbon (PAC)
- End Caps: Polypropylene (PP)
- Netting: Low Density Polyethylene
- Maximum Operating Temperature: 125°F (52°C)

ORDERING SELECTION

MODEL	TYPE	MICRON (Nominal)	LENGTH	OUTER DIAMETER	END CAP MATERIAL
CB1-10	Standard	1	10"	Ø2.5" (63 mm)	Polypropylene (PP)
CB5-10	Standard	5	10"	Ø2.5" (63 mm)	Polypropylene (PP)
CB1-20	Standard	1	20"	Ø2.5" (63 mm)	Polypropylene (PP)
CB5-20	Standard	5	20"	Ø2.5" (63 mm)	Polypropylene (PP)
CB1-1088	Big Blue	1	10"	Ø4.5" (110 mm)	Polypropylene (PP)
CB5-1088	Big Blue	5	10"	Ø4.5" (110 mm)	Polypropylene (PP)
CB1-2088	Big Blue	1	20"	Ø4.5" (110 mm)	Polypropylene (PP)
CB5-2088	Big Blue	5	20"	Ø4.5" (110 mm)	Polypropylene (PP)
